# The Future of Cybersecurity - Today

A new approach to information security

**axenic**  
Pure Security

About Us

Who is **axenic** ?  
Pure Security

The 1990's called...  
they want their risk assessment report back

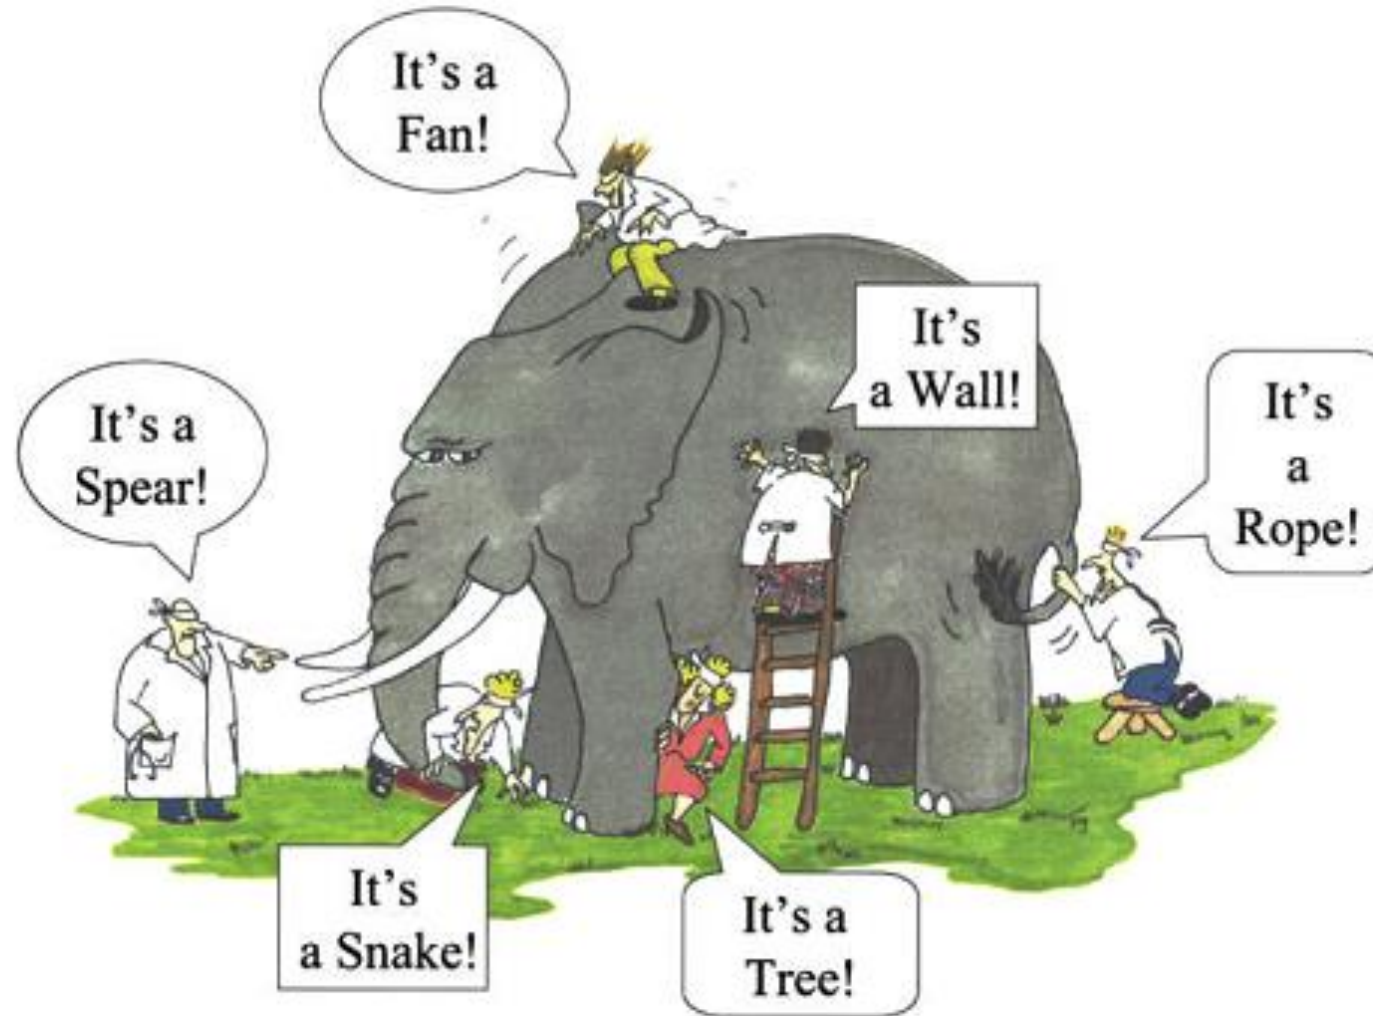

# Point in time snapshots

Critical risk and assurance insights are 'trapped' in dozens or hundreds of static documents

# Getting the big picture

It is challenging to see the big picture of organisational cybersecurity risk

# Compliance vs. risk management

Cybersecurity risk management is focused on the process itself rather than managing risk

# Investing in cybersecurity

Cybersecurity investment is spent on 'widgets' that don't necessarily manage actual business risks

# The Future of Cybersecurity

# The future of cybersecurity

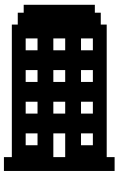

## What does cybersecurity look like in five years?

Risk stakeholders have accurate risk information to make business decisions

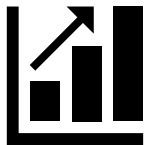

Assurance is a continuous process

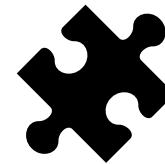

Cybersecurity risk is managed holistically across the enterprise and not in silos

Cybersecurity investment is traceable through to business risk reduction

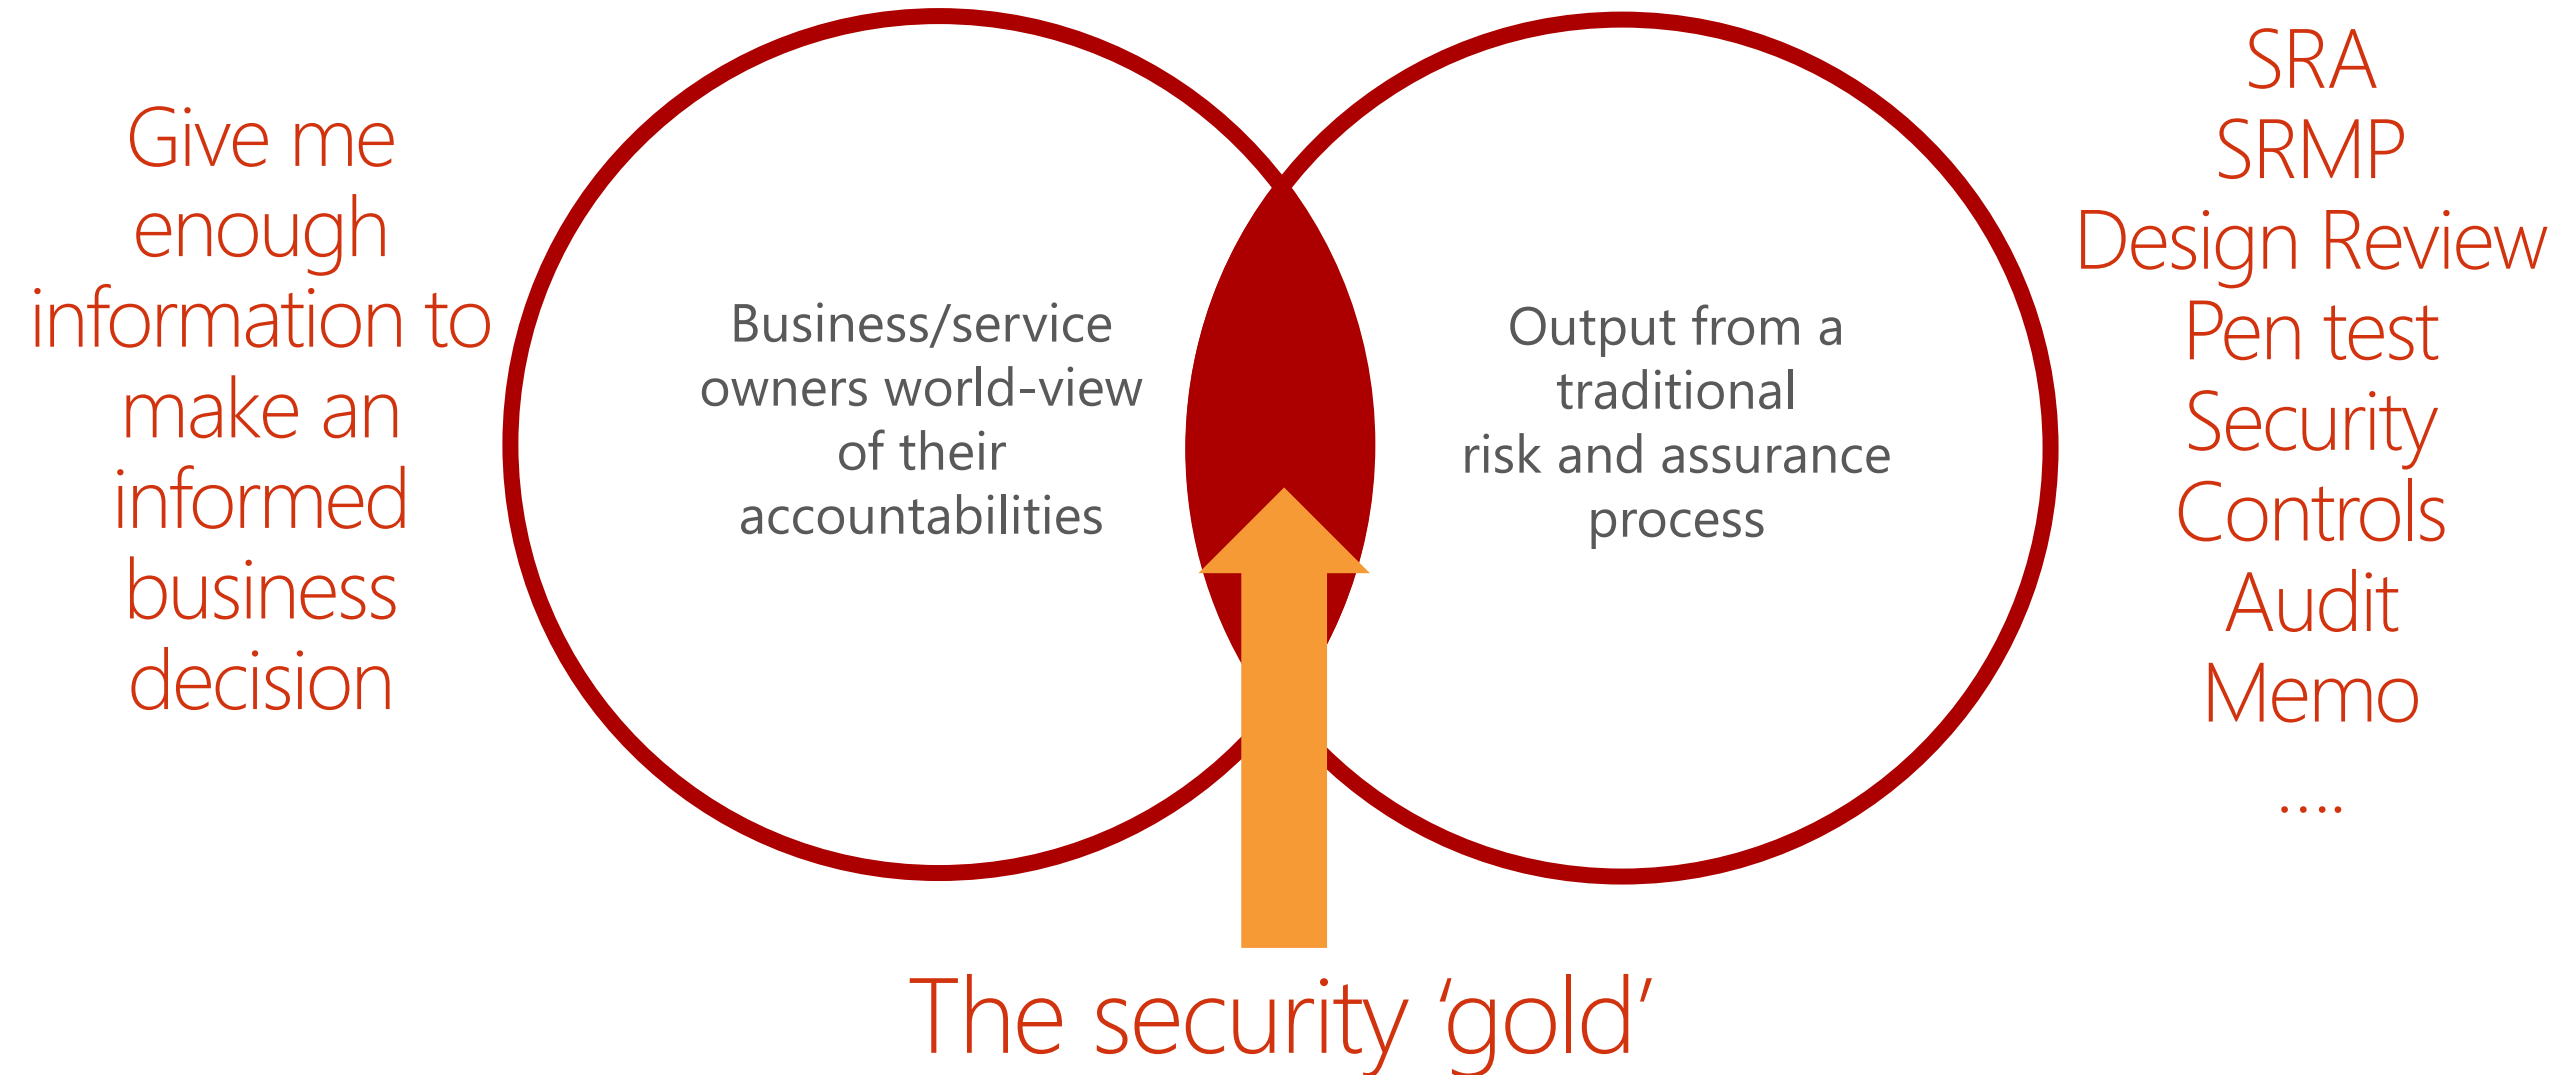

Cybersecurity maturity is measured through risk management

Cybersecurity tools dynamically update risk posture

# Mind the gap

# Key questions that we need to answer

What risks am I managing?

What (if anything) do I need to do about them?

Who will do what and when?

How are we progressing?

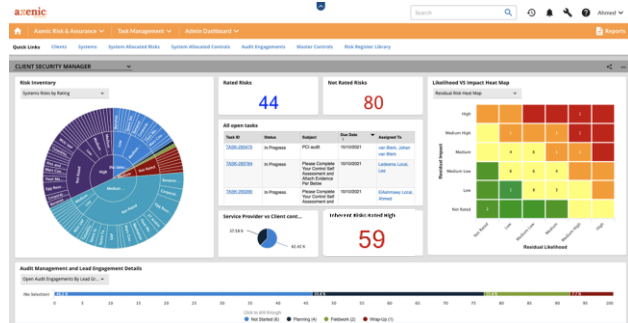

Have we sufficiently balanced risk and opportunity?

# The Future of Cybersecurity TODAY

# About Axenic

Axenic is a pure security company; in fact, our name means pure. We provide truly independent advice that is free from influence to ensure you can make informed decisions about how to protect your information.

We don't sell products, partner with vendors, or offer technical implementation services. Instead, we provide practical, real-world information security and privacy solutions based on national and international frameworks, delivered by passionate and experienced people.

We combine state-of-the-art frameworks, standards and methodologies with our team's knowledge and experience in the delivery of successful client projects. The combination of independence, knowledge and deep experience builds real wisdom. It enables our clients to collect and store information responsibly, while giving them the confidence and ability to put their information to highly effective, high value use.

To talk about how Axenic can help please contact our Managing Director, Terry Chapman on [terry.chapman@axenic.co.nz](mailto:terry.chapman@axenic.co.nz) or +6421912739.
