

Risk management fundamentals for everyone - RiskNZ Members \$115 + GST, Non-members \$140 + GST

Do you want to align your organisation on a common view of risk?

We all manage risk every day in our personal lives. And, even for people in your organisation who have no formal risk

management responsibilities, they still manage it informally in the workplace.

This course is designed to be delivered to everyone in an organisation, providing a foundation for a common

understanding of risk, how it is managed every day, and why it is important to them.

Our trainers strip away the jargon and discuss risk concepts in plain language using relatable examples, culminating in

the key behaviours you can implement to improve the risk culture of your organisation.

The course is presented by:

- David Tattam, Chief Research & Content Officer, Protecht
- Michael Howell, Research & Content Lead, Protecht

Course description:

In this course, you'll learn:

1. Why do we do risk management?
